BCSIR, Dhaka. <u>List of accepted process (considerable for leasing)</u>

l	Production of Wood Varnish from seed lac-1979
2.	Production of Break oil-1979
3.	Production of Purification of Honey-1979
4.	Production of sweet for diabetic patient-1986
5.	Production of Lubricating grease-1987
5.	Production of domestic oven -1989
7.	Production of plaster of parish -1990
3.	Production of Textile Sizing Compound-1990
9.	Production of Activated bleaching earth-1990
10.	Production of Diabetic Orange squash-1991
11.	Production of Diabetic Pineapple Jam-1991
12.	Production of Diabetic Orange Jelly-1991
13.	Production of Synthetic Glue for Wood, Paper, Leather & Plastic-1992
14.	Production of Instant Tea-1992
15.	Production of Jute cutting cadies & Paper Pulp-1992
16.	Spirulina (Semi Commercial) Cultivation Process-2002
17.	Production of Spot Test Solution for identification of Iodine in Table Salt-1993
18.	Production of Test Kit for Identification of Iodine in Iodized Salt -1993
19.	Production of diabetic Biscuit-2005, IFST
20.	Production of Low Cost Weaning Food-1993
21.	Production of Powder Cleaner-1994
22.	Production of Textile Softening Agent-1995
23.	Production of Long Life Bread-1995
24.	Production of Mixed Food of Maize and Soya- bean-1995
25.	Production of White shoe shine-1995
26 .	Production of Brow pulp from patipata & hand made paper-1996
27.	Production of Wash powder-1996
28.	Production of Wax pencil-1997
29.	Production of Anti-acidic Biscuit-1997
30.	Production of Instant drink from ripe mango pulp -1997
31.	Production of Wheat flex-1997
32.	Production of Commercial fuel from press mad-1997
33.	Production of Bleach Lac from seed lac -1997
34.	Production of Dewaxed lac from seed lac -1997
35.	Production of Condensed milk-1997
36.	Production of Green mango pulp powder for instant drink-1997
37.	Production of Transparent gum-1999
38.	Production of Ginger & garlic paste-2000
39.	Production of Preservation of bamboo-2001
40.	Production of Spirulina -2001
41.	A process for the production of rubber threads
42.	Preparation of meat meal from slaughterhouse wastes for feeding poultry.
43.	Preparation of blood meal from slaughterhouse wastes for feeding poultry.
44.	A Process for the production of Jack fruit Biscuit-2003
45.	A Process for the production of Ata for Diabetic patient, 2003, IFST
46.	A Process for the production of All Season Turmeric cream, 2004, DL.
47.	A Process for the production of Neem Facial Cream, 2004, DL.
48.	A Process for the production of Jack fruit Juice-2004,
49.	A Process for the production of Onion Paste-2005, IFST
50.	A Process for the production of Liquid Soap to clean hydrocarbon waste-2005, DL
51.	Production of vitamin, mineral and protein enriched bread from wheat flo
52.	A process for the production of colour pigments from local clay
53.	A Process for the production Herbal Hair Oil/Tonic
54.	A Process for the production of Fermented Vinegar from Palm Juice
55.	A process for making offset printing plate
55.	200/11m
	CHANGE
	st (final) 1 ত্বাদেন মোঃ মাসুদে বিষয়ে ক্যান্ত্র্যা অফিলার

A process for the production of duplicating ink		A process for the production of all season cream
A process for the production of lactic acid from sugar cane back strap molasses A process for the production of butanol from molasses 60. A process for the production of acetone from molasses 61. A process for the production of pulp from cellulose raw-materials e.g. cott sticks, soft wood, jute sticks, bagasses or the like 62. A process for the production of pulp from cellulose raw-materials e.g. cott sticks, soft wood, jute sticks, bagasses or the like 63. A process for the production of carefulene by pyrolysis 64. A process for the production of acetylene by pyrolysis 65. A process for the production of acetylene by pyrolysis 66. A process for the production of acetylene by pyrolysis 67. Production of pulp for the manufacture of rayon from jute waste and jute stick DL 68. A process for the production of board grade pulp from jute sticks- DL 69. A process for isolating jute seed oil strophanthidin and raffinose from jute seed DL 70. A process for the production of refined kerosene (free from irritant odor) DL 71. A process for the extraction of filter from pineapple leaves & making rop cordage fabrics and embroidery threads there from - DL 72. Production of rennet enzyme from the stomach of young animals.—DL 73. A process for the production of low temperature enamel colors for decorating glass wares- DL 74. A process for the production of causticised potash - DL 75. A process for the production of causticised potash - DL 76. A process for the production of causticised potash - DL 77. Production of soogolamine hydrochloride from dutura fastusas seed - DL 78. Production of soogolamine hydrochloride from dutura fastusas seed - DL 79. Production of soogolamine hydrochloride from dutura fastusas seed - DL 79. Production of soogolamine hydrochloride from dutura fastusas seed - DL 81. Preparation of poultry feed for layers from indigenous raw materials - DL 82. A process for the production of bland flavor & debittered full-fat Soya flou IPST 84. A process for the production of one of the production of counting proce	57	
A process for the production of butanol from molasses 61. A process for the production of actone from molasses 62. A process for the production of pulp from cellulose raw-materials e.g. cotto sticks, soft wood, jute sticks, bagasses or the like 63. A process for the production of citric acid from sugar cane molasses 64. A process for the production of acetylene by pyrolysis 65. A process for the production of acetylene by pyrolysis 66. A process for the production of acetylene by pyrolysis 67. Production of pulp for the manufacture of rayon from jute waste and jute stick DL 68. A process for the production of board grade pulp from jute sticks-DL 69. A process for the production of board grade pulp from jute sticks-DL 69. A process for isolating jute seed oil strophanthidin and raffinose from jute seed DL 70. A process for the extraction of fiber from pineapple leaves & making rope cordage fabrics and embroidery threads there from - DL 71. A process for the production of fiber from pineapple leaves & making rope cordage fabrics and embroidery threads there from - DL 72. Production of rennet enzyme from the stomach of young animals DL 73. A process for the production of low temperature enamel colors for decorating glass wares-DL 74. A process for the production of casticised potash - DL 75. A process for the production of casticised potash - DL 76. A process for the production of casticised potash - DL 77. A steam jacket molding plant for production of polystyrene foam - DL 78. Production of soopolamine hydrochloride from tatura fastuosa seed - DL 79. Production of soopolamine hydrochloride from tatura fastuosa seed - DL 79. Production of poultry feed for layers from indigenous raw materials - DL 80. Preparation of poultry feed for layers from indigenous raw materials - DL 81. Proparation of poultry feed for layers from indigenous raw materials - DL 82. A process for the stabilization of fiber from the leaf bases of betel nut plants - DI 83. A process for the production of obana leather-DL 84. A process for t		
60. A process for the production of acetone from molasses 61. A process for the recovery of sucrose from molasses 62. A process for the production of pulp from cellulose raw-materials e.g. cotto sticks, soft wood, jute sticks, bagasses or the like 63. A process for the production of citric acid from sugar cane molasses 64. A process for the production of acetylene by pyrolysis 65. A process for the production of acetylene by pyrolysis 66. A process for the production of azobenzene from nitrobenzene 67. Production of pulp for the manufacture of rayon from jute waste and jute stick 68. A process for the production of board grade pulp from jute sticks-DL 69. A process for the production of refined kerosene (free from irritant odor) DL 70. A process for the production of refined kerosene (free from irritant odor) DL 71. A process for the production of refined kerosene (free from irritant odor) DL 72. Production of rennet enzyme from the stomach of young animals. → DL 73. A process for the production of low temperature enamel colors for decorating glass wares. DL 74. A process for the production of oxalic acid from molasses-DL 75. A process for the production of causticised potash → DL 76. A process for the production of causticised potash → DL 77. A steam jacket molding plant for production of polystyrene foam → DL 78. Production of scopolamine hydrochloride from datura fastuosa seed → DL 79. Production of socyolamine hydrochloride from datura fastuosa seed → DL 79. Production of poultry feed for starters from indigenous raw materials → DL 81. Preparation of poultry feed for starters from indigenous raw materials → DL 82. A process for the extraction of fiber from the leaf bases of bettel nut plants → DL 83. A process for the production of bland flavor & debittered full-fat Soya flow 1PST 84. A process for the production of pannal leather-DL 87. A process for the production of soya-dadhi-IFST 85. A process for the production of band flavor & debittered full-fat Soya flow 1PST 86. A process for the production of hi		
A process for the recovery of sucrose from molasses A process for the production of pulp from cellulose raw-materials e.g. cotte sticks, soft wood, jute sticks, bagasses or the like A process for the production of citric acid from sugar cane molasses A process for the production of acotylene by pyrolysis A process for the production of acotylene by pyrolysis A process for the production of acotylene by pyrolysis A process for the production of acotylene by pyrolysis A process for the production of board grade pulp from jute waste and jute stick DL A process for the production of board grade pulp from jute waste and jute stick DL A process for isolating jute seed oil strophanthidin and raffinose from jute seed DL A process for the extraction of fiber from pineapple leaves & making rope cordage fabrics and embroidery threads there from - DL Production of remnet enzyme from the stomach of young animals DL A process for the production of low temperature annel colors for decorating glass wares- DL A process for the production of oxalic acid from molasses- DL A process for the production of oxalic acid from molasses- DL A process for the production of causticised potash - DL A process for the production of causticised potash - DL Production of socylenamine hydrochloride from datura fastuosa seed - DL Production of socylenamine hydrochloride from datura fastuosa seed - DL Production of socylenamine hydrochloride from datura fastuosa seed - DL Production of socylenamine hydrochloride from datura fastuosa seed - DL Production of socylenamine hydrochloride from datura fastuosa seed - DL Production of socylenamine hydrochloride from datura fastuosa seed - DL Proparation of poultry feed for layers from indigenous raw materials - DL Preparation of poultry feed for starters from indigenous raw materials - DL Preparation of poultry feed for starters from indigenous raw materials - DL Preparation of poultry feed for starters from indigenous raw materials - DL A process for the production of band flavor & debitiered full-fat		
A process for the production of pulp from cellulose raw-materials e.g. cotto sticks, soft wood, jute sticks, bagasses or the like 63. A process for the production of citric acid from sugar cane molasses 64. A process for the production of citric acid from sugar cane molasses 65. A process for the production of acobenzene from nitrobenzene 66. A process for the production of acobenzene from nitrobenzene 67. Production of pulp for the manufacture of rayon from jute waste and jute stick DL 68. A process for the production of board grade pulp from jute sticks-DL 69. A process for isolating jute seed oil strophanthidin and raffinose from jute seed DL 70. A process for the production of refined kerosene (free from irritant odor) DL 71. A process for the extraction of fiber from pineapple leaves & making rope cordage fabrics and embroidery threads there from - DL 71. Production of renne renzyme from the stomach of young animals. – DL 72. Production of renne production of low temperature enamel colors for decorati glass wares-DL 73. A process for the production of causticised potash - DL 74. A process for the production of causticised potash - DL 75. A process for the production of citric acid from molasses-DL 76. A process for the production of citric acid from raw sugar by fermentation - DI 77. A steam jacket molding plant for production of polystyrene foam - DL 78. Production of 80% crude glycerin of low salt content from alkali enriched so lye - DL 80. Preparation of poultry feed for layers from indigenous raw materials - DL 81. Preparation of poultry feed for layers from indigenous raw materials - DL 82. A process for the extraction of fiber from datura fastuosa seed - DL 83. A process for the production of banana leather-DL 84. A process for the production of banana leather-DL 85. A process for the production of banana leather-DL 86. A process for the production of banana leather-DL 87. A process for the production of high caloric biscuits in small package-IFST 98. A process for the prod		
sticks, soft wood, jute sticks, bagasses or the like A process for the production of citric acid from sugar cane molasses A process for the production of citric acid from sugar cane molasses A process for the production of acetylene by pyrolysis A process for the production of azobenzene from nitrobenzene Production of pulp for the manufacture of rayon from jute waste and jute stick DL A process for the production of board grade pulp from jute sticks - DL A process for the production of board grade pulp from jute sticks - DL A process for isolating jute seed oil strophanthidin and raffinose from jute seed DL A process for the production of refined kerosene (free from irritant odor) DL A process for the extraction of fiber from pineapple leaves & making rope cordage fabrics and embroidery threads there from - DL A process for the production of low temperature enamel colors for decorating glass wares- DL A process for the production of oxalic acid from molasses- DL A process for the production of causticised potash - DL A process for the production of causticised potash - DL A process for the production of causticised potash - DL A process for the production of citric acid from raw sugar by fermentation - DI A steam jacket molding plant for production of polystyrene foam - DL Production of scopolamine hydrochloride from datura fastuosa seed - DL Preparation of poultry feed for layers from indigenous raw materials - DL A process for the extraction of fiber from the leaf bases of betel nut plants - DI A process for the extraction of fiber from the leaf bases of betel nut plants - DI A process for the production of peanut butter - IFST A process for the production of of santares from indigenous raw materials - DL Preparation of poultry feed for layers from indigenous raw materials - DL A process for the production of higher from the leaf bases of betel nut plants - DI A process for the production of fiber from the leaf bases of betel nut plants - DI A process for the production of of peanut butter - IFST A process f

A process for the extracting fibre from the bark of Ulot kombal plant-RAJ 93. A process for the preparation of stearic acid from beef tallow -RAJ 94. Production of readymade transparent wood varnish from seed lac -RAJ 95. A process for the production of heat resistant & water proof coating compositi for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL	82.	A process for the extraction of fiber from the leaf bases of betel nut plants - DI
IFST A process for dyeing cotton fabric by mango leaf extract containing yellow dy DL 86. A process for the production of banana leather-DL 87. A process for the improvement in preparation of cotarnine-DL 88. A process for the production wood adhesive-DL 89. A process for the production of high caloric biscuits in small package-IFST 90. A process for the production of soya-dadhi-IFST 91. A process for the production of red paint-DL 92. A process for the extracting fibre from the bark of Ulot kombal plant-RAJ 93. A process for the preparation of stearic acid from beef tallow -RAJ 94. Production of readymade transparent wood varnish from seed lac -RAJ 95. A process for the production of heat resistant & water proof coating compositi for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL	83.	A process for the stabilization of peanut butter -IFST
A process for dyeing cotton fabric by mango leaf extract containing yellow dy DL 86. A process for the production of banana leather-DL 87. A process for the improvement in preparation of cotarnine-DL 88. A process for the production wood adhesive-DL 89. A process for the production of high caloric biscuits in small package-IFST 90. A process for the production of soya-dadhi-IFST 91. A process for the production of red paint-DL 92. A process for the extracting fibre from the bark of Ulot kombal plant-RAJ 93. A process for the preparation of stearic acid from beef tallow -RAJ 94. Production of readymade transparent wood varnish from seed lac -RAJ 95. A process for the production of heat resistant & water proof coating composition for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL	84.	
DL 86. A process for the production of banana leather-DL 87. A process for the improvement in preparation of cotarnine-DL 88. A process for the production wood adhesive-DL 89. A process for the production of high caloric biscuits in small package-IFST 90. A process for the production of soya-dadhi-IFST 91. A process for the production of red paint-DL 92. A process for the extracting fibre from the bark of Ulot kombal plant-RAJ 93. A process for the preparation of stearic acid from beef tallow -RAJ 94. Production of readymade transparent wood varnish from seed lac -RAJ 95. A process for the production of heat resistant & water proof coating composition for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsudihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL		
A process for the production of banana leather-DL A process for the improvement in preparation of cotarnine-DL A process for the production wood adhesive-DL A process for the production of high caloric biscuits in small package-IFST A process for the production of soya-dadhi-IFST A process for the production of red paint-DL A process for the extracting fibre from the bark of Ulot kombal plant-RAJ A process for the preparation of stearic acid from beef tallow -RAJ A process for the production of heat resistant & water proof coating composition for wooden and paper bobbins - DL A process for the production of an indelible marking ink - DL A process for the production of ammonium chloride and sodium sulphate - DL A process for the production of artificial slate -IGCRT A process for the production of shell-on-eggs under ambient conditions-IFST Improvements in or relating to a process and a plant for the recovery of gypsudihydrate from "Phospho-gypsum" - DL Preparation of blood meal, a protein concentrate for making poultry feed - DL A process for the preparation of an improved quality fat-splitting reagent - DL A process for the extraction of starch from the sheathes of banana plant, DL	85.	
A process for the improvement in preparation of cotarnine-DL 88. A process for the production wood adhesive-DL 89. A process for the production of high caloric biscuits in small package-IFST 90. A process for the production of soya-dadhi-IFST 91. A process for the production of red paint-DL 92. A process for the extracting fibre from the bark of Ulot kombal plant-RAJ 93.  92. A process for the extracting fibre from the bark of Ulot kombal plant-RAJ 93. A process for the preparation of stearic acid from beef tallow -RAJ 94. Production of readymade transparent wood varnish from seed lac -RAJ 95. A process for the production of heat resistant & water proof coating compositi for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL 		
93. A process for the preparation of stearic acid from beef tallow -RAJ 94. Production of readymade transparent wood varnish from seed lac -RAJ 95. A process for the production of heat resistant & water proof coating compositi for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL		
 94. Production of readymade transparent wood varnish from seed lac -RAJ 95. A process for the production of heat resistant & water proof coating compositi for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL 		
95. A process for the production of heat resistant & water proof coating composition for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsudihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL		
for wooden and paper bobbins - DL 96. A process for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL		
96. A precess for the production of an indelible marking ink - DL 97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL)3.	
97. A process for the production of ammonium chloride and sodium sulphate - DL 98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL	96	
98. A process for the production of artificial slate -IGCRT 99. A process for the preservation of shell-on-eggs under ambient conditions-IFST 100. Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL		
 A process for the preservation of shell-on-eggs under ambient conditions-IFST Improvements in or relating to a process and a plant for the recovery of gypsu dihydrate from "Phospho-gypsum" - DL Preparation of blood meal, a protein concentrate for making poultry feed - DL A process for the preparation of an improved quality fat-splitting reagent - DL Preparation of a non-ionic surface active agent from fatty acids - DL A process for the extraction of starch from the sheathes of banana plant, DL 		
Improvements in or relating to a process and a plant for the recovery of gypsudihydrate from "Phospho-gypsum" - DL Preparation of blood meal, a protein concentrate for making poultry feed - DL A process for the preparation of an improved quality fat-splitting reagent - DL Preparation of a non-ionic surface active agent from fatty acids - DL A process for the extraction of starch from the sheathes of banana plant, DL		
dihydrate from "Phospho-gypsum" - DL 101. Preparation of blood meal, a protein concentrate for making poultry feed - DL 102. A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL		Improvements in or relating to a process and a plant for the recovery of gypsy
Preparation of blood meal, a protein concentrate for making poultry feed - DL A process for the preparation of an improved quality fat-splitting reagent - DL Preparation of a non-ionic surface active agent from fatty acids - DL A process for the extraction of starch from the sheathes of banana plant, DL		
A process for the preparation of an improved quality fat-splitting reagent - DL 103. Preparation of a non-ionic surface active agent from fatty acids - DL 104. A process for the extraction of starch from the sheathes of banana plant, DL	101.	
Preparation of a non-ionic surface active agent from fatty acids - DL A process for the extraction of starch from the sheathes of banana plant- DL		
104. A process for the extraction of starch from the sheathes of banana plant, DL

pc/process list (final)		प्राची विकास के वितास के विकास

106	A process for the production of an adhesive from seed- DL
106.	A process for thermal and/or sound insulating board from jute stick -DL
107.	A process for the preparation of a vacuum gasket cement - DL
108.	A process for the production of house hold cleaner (solid) from industrial waste
109.	products and locally available raw materials, chemicals- DL A process for the extraction of fibers from dab-shell (green coconut shell) waste-
109.	DL
110.	A process for the production of household cleaner (liquid)- DL
111.	A process for the production of a starch based high quality adhesive - DL
112.	A process for the production of instant tea - DL
113.	A process for the recovery of silver from photographic waste solution- DL
114.	A process for the production of starch from Musaparadisica plant -RAJ
115.	Production of mosquito repellent ointment for application to the skin -RAJ
116.	A process for the production of sericin from silk washing -RAJ
117.	A process for the production of long preserving dadhi(Cuard) -IFST
118.	A process for the preservation of indigenous roofing materials for rural housing - DL
119.	A process for the preparation of brake fluid -IFRD
120.	A process for the production of soya sauce -IFST
121.	A process for the production of dehydrated potato-IFST
122.	A process for the production of strychnine from strychnos nux-vomica seeds
	DL
123.	A process for the refining and stabilization of oil from (pari boiled) rice bran
10.4	DL
124.	A process for the production of zinc based water borne wood preservative - DL
125.	A process for the production of water proof flexible board from jute stick - DL A process for the preparation of artificial Geolite for softening of hard water
126.	DL
127.	Production of ethylparaben (4-hydroxybenzoic acid ethyl ester) - DL
128.	A process for the production of dewaxed shellac flakes from seed lac-RAJ
129.	Production of propylparaben (4-hydroxybenzoic acid propyl ester) - DL
130.	Production of methylparaben (4-hydroxybenzoic acid methyl ester) - DL
131.	A process for the blenching of a raw linseed fiber for commercial utilization-DI
132.	An improved procedure for preparing cotarnine chloride-DL
133.	A process for the production of ferrous ammonium sulfate for laborator reagent-DL
134.	A process for the production of citric acid from cane molasses by fermentation RAJ
135.	A process for the preparation of a sulphonated oil-RAJ
136.	A process for the production of insulating tape from dewaxed shellac-RAJ
137.	A process for the innovation for a new solar cooker-IFRD
138.	A process for making cotton fabrics & jute hessians fire retardant using calcium
120	chloride and ammonium sulfate -DL
139.	A process for the dyoing actton fabric by discovered ambreventeria bark extra
140.	A process for the dyeing cotton fabric by diospyros embrayopteris bark extraction containing chocolate colored dye -DL
141.	A process for the production of picric acid -DL
142.	A process for the production of pietre acid -DE A process for the manufacture of black on-glaze ceramic colour -DL
143.	A process for the synthesis of glycerophosphate of calcium -DL
144.	A process for the production of monosodium glutamate -DL
145.	A process for the production of rot-proofing jute fibre -DL
146.	A process for the preparation of a cola drink -IFST
147.	A process for rubberization of pressing roller of spinning machine-DL
148.	A process for the production of piperazine citrate -DL
149.	A process for the extraction of diosgenin from costus specious (Koenig) SM DL
	Improvements in or relating to a process for the production of a composition for
150.	correcting errors in typing sketching drawing etc. DI
150. 151.	correcting errors in typing, sketching, drawing etcDL A process for the production of a quality gum from starch -DL

152	CTG A process for allow describe modified lineard oil produced in Bangladesh BAI
153.	A process for alkyd resins modified linseed oil produced in Bangladesh-RAJ
154.	A process for the preparation of a citrus soft drink -IFST A process for the preparation of glucosamine hydrochloride from lobster shells
155.	CTG
156.	A process for the preparation of a lemon crush -CTG
157.	A process for the preparation of jelly from jackfruit waste -DL
158.	A process for the preparation of glue from fish scales-DL
159.	A process for the purification of gum acacia (Pat. No.1001686)- RAJ
160.	A process for the preparation of carboxymethyl cellulose from rayon waste RAJ
161.	A process for the production of zinc chloride from zinc dross and zinc scrap -DI
162.	A process for the production of zinc acetate from zinc ash - RAJ
163.	A noble process for dyeing of bamboo articles to fawn and brown colours- RAJ
164.	A process for the production of drawing ink from seed lac- RAJ
165.	A process for the production of garlic pearl from garlic (Alum sativum)-RAJ
166.	A process for the production of mesta pectin jelly-RAJ
167.	A process for the production of precipitated calcium carbonated sodium sulfate DL
168.	A process for the production of zinc sulfate from zinc ash -DL
169.	Fire retarding treatment of jute hessian and cotton fabrics by using ammonium
	phosphate, ammonium sulfate and sodium silicate-DL
170.	A process for the production of raw synthetic yellow dye-DL
171.	A process for the production of soya spread - IFST
172.	A process for the preparation of jelly from ripe tomato-IFST
173.	A process for the production of gummed paper tape -DL
174.	A process for the extraction, concentration and preservation of liquid pecti
	from fruits of Bangladesh- RAJ
175.	Improvements in or relating to a process for the production of acid resistar silicate cement -DL
176.	A process for making flexible leather board -DL
177.	A process for the manufacture of activated blenching earth from Bijoypur cla for refining of edible fats and oil -DL
178.	A process for the production of bandages impregnated with plaster of Paris-DL
179.	A process for the preparation of new brake fluid formula -IFRD
180.	A process for the design and construction of multiple cooking stove-IFRD
181.	A process for the preparation of water softening agent -DL
182.	A process for improved model of domestic gas cooking stove -IFRD
183.	Process for dyeing cotton fabric by targets creeta petals extract containing yellow coloured dye- RAJ
184.	A process for the production of poultry feed from the waste silk worm at the sil industries- RAJ
185.	A process for the production of industrial grade caustic potash ACE cleanin powder- RAJ
186.	A process for the production of carbonated pineapple juice-DL
187.	A process for the production of super non-bronze blue-DL
188.	A process for preparing para cetamol from phenol-DL
189.	A process for the production of liquid cleaner for porcelain materials-DL
190.	A process for the production of yellow iron oxide pigment -DL
191.	A process for the simplified model of domestic oven -DL
192.	A process for the production of white cover coat enamel frit - DL
193.	A process for the preparation of water filter for purifying drinking purposes -DI
194.	Design and fabrication of solar oven model 2 for cooking using solar energy IFRD
195.	A process for solar oven shade less model -IFRD
196.	A simple and cheap process for the production of high grade ammonium chloride- RAJ
197.	A process for the production of printing ink (black)- RAJ
198.	A process for high efficiency insulating blanket for improved stove -IFRD
170.	11 process for fight efficiency insulating blanker for improved stove -IFRD
199.	A process for the production of multipurpose adhesive from waste polyme

200.	Production of quality sizing compound suitable for use in jute and textile industries-DL
201.	Biogas from poultry excreta and offal's-IFRD
202.	Production of high grade turkey red oil from castor seed soil- RAJ
203.	Production of tablet for instant detection of hardness in water-DL
204.	Production of polymer based high quality fixing gum-DL
205.	A process for formulation of quality dish washing detergent powder from locally available materials - RAJ
206.	A process for the production of high glossy water-resistance oleoresinous wood varnish from tobacco seed oil - RAJ
207.	Improved model of traditional double cook stove for all kinds of traditional fuels-IFRD
208.	Development of an inexpensive culture medium Bangladesh (Medium 1) for spirulina culture-DL
209.	Smokeless model of improved stove for domestic cooking-IFRD
210.	A process for the production of sodium silicate from rice husk ashDL F
211.	Production of deep brown shade on silk fabric and yara with khair- RAJ
212.	A process for the production of ground coat enamel frit -IGCRT
213.	A process for the production of paper pulp from whole jute plant and jute wastes (jute cutting and caddies) by soda anthraquinone -LRI
214.	A process for the production of potassium sesqui carbonate -IFRD
215.	A process for conversion of petrol engine to a duel fuel engine for natural gas at atmospheric pressure and petrol -IFRD
216.	A process for design and fabrication of a fixed-dome biogas plant -IFRD
217.	Drying cotton fabric by myctanthes arbortrestis stalks extract containing yellow colour dye-DL
218.	A process for the production of sodium lelenolyl sulphate-DL
219.	A process for the production of Ferro cement gas holder -DL
220.	A process for the preparation of glue from tannery waste -LRI
221.	A process for the production of B.F. baby food - IFST
222.	A process for the production of highly flexible leather board -LRI
223.	A process for the production of shaving brush -RAJ
224.	A process for the preparation of Zelatin from hide trimmings -LRI
225.	A process for the production of boric acid from locally available hydrochloric acid and imported commercial borax -DL
226.	A process for the production of analytical grade soluble starch for iodometry-DL
227.	A process for the production of ultramarine blue from Bijoypur Clay -IFST
228.	A process for the production of prussian blue pigment -DL
229.	A process for the production of anti-acidic bread based on wheat flour- RAJ
230.	A process for the production of anti-acidic biscuit based on wheat flour- RAJ
231.	A process for the production of animal feed from sugarcane bagasse - RAJ
232.	A process for the production of high protein super biscuit from ground nut seed meal- RAJ
233.	Production of Baker's yeast from molasses in semi-pilot plant scale. IFST.31.08.96.
234.	A process for the production of GRC spice (Garlic, Coriander, Randhuni)- RAJ
235.	A process for the production of Radish Chips- RAJ
236.	Automatic Digital Counter-DL
237.	A process for the production of Coriander Pickle- RAJ
238.	A process for the production of Salted Lime Peel Pickle- RAJ
239.	A process for the production of Anti-mosquito Cream-RAJ
240.	A process for the production of a Attar based Mosquito Coil (free of health and environmental hazard)-RAJ
241.	Production of Neems Quia and Anti-Mosquito Spray based on natural product-RAJ
242.	Improvement in or relating to a process for the production of sodium hydrosulphite -PP&PDC
243.	Production of high protein and vitamin enriched groundnut butter from groundnut -RAJ
	st (final)

245. A process for the production of Cassava (Topioca) starch-DL 246. A process for the production of signature security Ink Pad-DL 247. Production of wrapping paper from whole Patipata plant (Schumanniathu dichotoma)-DL 248. Production of bigh protein and vitamin enriched bread from groundnut see meal -IFST 249. A process for the production of chitin from shrimp industry waste-2005,DL 250. A process for the production of orange yellow Azo dye -RAJ 251. Proper action of yellow colored dye extracted from the stalk of indigenous plar for dyeing cotton fabric-RAJ 252. A process for the production of general reagent grade sodium chloride-PR&PDC 253. A process for the production of general reagent grade sodium chloride-PR&PDC 254. Production of resin modified bisphenolformaldehyde resin useful for makin marine paints-DL 255. A solar drying plant for post harvest-IFRD 256. A process for the preparation of green mango beverage-RAJ 257. Design and fabrication of poultry litter based fixed dome bio-gas plant-IFRD 258. A process for the preparation of plum-RAJ 259. A process for the preservation of plum-RAJ 260. A process for the production of stabilized rice bran-RAJ 261. A process for the production of stabilized rice bran-RAJ 262. A process for the production of mango leather from the pulp of mango-RAJ 263. A process for the production of mango leather from pulp of mango-RAJ 264. A process for the production of mango leather from pulp of papaya-RAJ 265. Production of quality performed wax pencil from locally available material 266. An improved new bael (wood apple) shoot from angle mammals fruits-CTG 267. Production of general reagent grade sodium chloride from the waste titrate o boric acid-DL 268. A process for the production of nicotine copper reduced chewing tobacco-RAJ 269. Production of pigh quality performed wax pencil from locally available material 270. Improvement in or relating to a process for the production of calcimined red iror oxide pigment-PP&PDC 271. A process for the production of nicotine copper re		A process for the preservation of Litchi Aril (Pulp) in sugar solution in bottle-
246. A process for the production of signature security Ink Pad-DL 247. Production of wrapping paper from whole Patipata plant (Schumanniath diehotoma)-Dl. 248. Production of high protein and vitamin enriched bread from groundnut see meal-IFST 249. A process for the production of chitin from shrimp industry waste-2005,DL 250. A process for the production of orange yellow Azo dye-RAJ 251. Proper action of yellow colored dye extracted from the stalk of indigenous plar for dyeing cotton fabric-RAJ 252. A process for the production of general reagent grade sodium chloride-PP&PDC 253. A process for the production of general reagent grade sodium chloride-PP&PDC 254. Production of resin modified bisphenolformaldehyde resin useful for makin marine paints-DL 255. A solar drying plant for post harvest-IFRD 256. A process for the preparation of green mango beverage-RAJ 257. Design and fabrication of poutry litter based fixed dome bio-gas plant-IFRD 258. A process for the preservation of plum- RAJ 269. A process for the production of stabilized rice bran- RAJ 260. A process for the production of tomato leather from pulp of mango- RAJ 261. A process for the production of chalta leather from pulp of mango- RAJ 262. A process for the production of chalta leather from pulp of papaya-RAJ 263. A process for the production of chalta leather from pulp of papaya-RAJ 264. A process for the production of stabilized rice bran- RAJ 265. Production of quality performed wax pencil from locally available material 266. An improved new bael (wood apple) shoot from angle mammals fruits-CTG 267. Production of general reagent grade sodium chloride from the waste titrate o boric acid-DL 268. A process for the production of incotine copper reduced chewing tobacco-RAJ 270. Improvement in or relating to a process for the production of calcimined red iron oxide pigment-PP&PDC 271. A process for the production of fight quality shaving cream-DL 272. 338.	A process for the production of carotene rich noodles - IFST
339.	A process for the production of salted beef - IFST
340.	A process for the production of rice and vegetable nutri diet- IFST
341.	A process for the production of green bael (wood apple) powder-DL
342.	A process for the production of slow releasing fertilizer tablets-2007,CTG
343.	A process for the production of instant tasty spirulina drinks-2005,IFST
344.	A process for the production of glycerol monostearate -DL
345. 346.	A process for the production of fish finger- IFST
347.	A process for the production of soya bread for diabetic patients. IFST. 11.07.04.
348.	A process for the production of mixed spices of beef rezala – 2005,IFST
349.	A process for the production of mixed mustard hilsha - IFST
350.	A process for the production of mixed spices for mutton rezala -2005, IFST
351.	A process for the production of mixed spices for fish curry -2005, IFST
352.	A process for the production of mixed spices for beef bhuna - IFST
352. 353.	A process for the production of mixed spices for chicken roast -2005, IFST A process for the production of mixed spices for chicken korma -2005, IFST
354.	A process for the production of mixed spices for chicken korma -2005, IFST A process for the production of mixed spices for mutton korma - 2005, IFST
355.	A process for the production of mixed spices for mutton curry - IFST A process for the production of mixed spices for mutton curry - IFST
356.	A process for the production of mixed spices for mutton curry - IFST A process for the production of mixed spices for marinated chicken fry - IFST
357.	A process for the production of infixed spices for marinated chicken fry - IFST A process for the production of artificial marble -IGCRT
358.	A process for the production of artificial marble -IGCR1 A process for the production of household washing powder-RAJ
359.	
360.	A process for the production of musabbar from <i>aloe vera- 2004,RAJ</i> A process for the preparation of oil soluble natural colourant from letters and
500.	A process for the preparation of oil soluble natural colourant from latkon seed - RAJ
361.	A process for the preparation of medicated dressing (Tulle) from <i>ricinus</i>
501.	communis oil-RAJ
362.	A process for the production of head lice killer oil from custard apple (Annona
	squamosa) leaf-RAJ
363.	A process for preparation and preservation of fruity papaya-2007,CTG
364.	Processing and preservation of ready to use ginger paste- IFST
365.	A process for the production of malted weaning food - IFST
366.	A process for the production of tamarind juice- 2005,IFST
367.	A process for the production of jackfruit juice -IFST
368.	A process for the herbal medicated hair oil from sesame oil -RAJ
369.	A process for the production of neem hair oil- 2005,IFST
370.	A process for the production of neem ointment-2005, IFST
371.	A process for the production of tomato powder-RAJ. 13.07.2004
372.	A process for the production of mango squash-RAJ
373.	A process for the production of gibberelic Plant Growth Regulator (PGR) - 2005, DL
374.	A process for the production of cytokinin Plant Growth Regulator (PGR)-2005,DL
375.	A process for the production of insulating bricks from rice husk ash -DL
376.	A process for the production of automobile spares (piston pin) –PP&PDC
377.	A process for the production of cloth marker –PP&PDC
378.	A process for the production of refractory bricks from rice husk ash -DL
379.	A process for the production of bearing materials –PP&PDC
380.	A process for the production of sodium hydro sulphide DL
381.	A process for the production of water filter candles -DL
382.	Preparation of low cost transparent glaze for the decoration of earthenware (pottery) body -DL
383.	A process for the production of natural pesticide for stored grains from a herbal source -RAJ
384.	A process for the production of instant high protein pakora mix. IFST. 05.04.2005.
385.	Improved model commercial single mouth cooking stove suitable for hotels, restaurants etc IFST
	1

	Production of vinegar from cane sugar cake molasses (Gur) by fermentation - IFST
388.	A process for the production of curry powder from mustard hilsha - IFST
389.	A process for the production of curry powder for beef rezala - IFST
390.	A process for the production of frozen beef burger steak - IFST
391.	A process for the production of Sweet for diabetic patients -IFST
392.	A process for the production of sponge Rashgollah for diabetic patients - 2005,IFST
393.	A process for the production of Sandesh for diabetic patients. IFST. 25.05.2005.
394.	A process for the preparation of powerful phenyl by using petuli seed oil -RAJ
395.	A process for the production of low cost tasty PAPAD using cassava flour-IFST
396.	A process for the production of Alum from locally available raw materials -DL
397.	A process for the production of wood seasoning chemicals from spent chrome liquor-LRI
398.	A process for the preparation of chrome alum from spent chrome liquor-LRI
399.	Isolation of aromatic oil from the dry leaves turmeric (curcuma Longa L) -CTG
400.	A process for the preparation of bleached jute fiber without delignation and degradation -DL
401.	A process for the production of herbal turmeric soap - CTG
402.	A process for the production of vitamin, mineral and protein enriched wheat
	flour.IFST.18.01.06.
403.	A process for the production of chemical pulp from cotton stalks -DL
404.	A process for the production of by formic acid pulping –DL
405.	A process for the production of instant chicken kabab mix- IFST
406.	A process for the production of mustard sauce- IFST
